CURTIS CALI

SOFTWARE DEVELOPER

Henderson, Nevada, United States | 408 315 6627 | curtiscali@pm.me | https://curtiscali.dev

PROFESSIONAL PROFILE

Full-Stack Developer specializing in scalable mobile and web solutions with seven years of experience.. Proficient in building scalable applications using .NET MAUI, .NET Framework, and various front-end web development frameworks. Known for consistently delivering impactful results in federal, state-level, and international emergency responses. Proven problem-solving and collaboration skills with a strong ability to adapt to new technologies as required. Seeking remote development opportunities with purpose at an exciting growth company.

WORK EXPERIENCE

SOLUTIONS DEVELOPER   Chainbridge Technologies | Vienna, VA | Jun 2017 - Present
At Chainbridge Technologies, I developed logistics and data collection software for various federal agencies including the DOE, FEMA, and USAID. In performing my duties, I worked with both local and remote employees located all over the country, maintaining consistent communication with all relevant team members. I also worked diligently in order to ensure business requirements were clarified and met. I designed & developed new features and fixed bugs in various software systems as needed.
- Successfully delivered a Mobile App for USAID's Bureau of Humanitarian Assistance (BHA) from scratch to MVP in 3 months
- Wrote 75% of the ARMS mobile app used by DOE and ensured consistent quality in releases with minimal delay.
- Overhauled the UX of the ARMS Website cutting navigation time in half.
- Enhanced FEMA's mobile data collection capabilities by ensuring 5 successful releases for the RadResponder Mobile App
- Wrote Android & iOS apps to help the DOD learn how to use and develop mobile apps for CBRNResponder's external REST APIs

SOFTWARE ENGINEER INTERN   Cisco Systems | San Jose, CA | May 2016 - Aug 2016
I implemented a REST API for Google Maps to improve loading performance by 95%, panning performance by 15%, and zooming performance by 9%.

SOFTWARE ENGINEERING INTERN   Datto Inc | Norwalk, CT | Jun 2015 - Aug 2015
Assisted with development of prototype product Datto Network Appliance (DNA). Implemented network failover prioritization, refined graphs with D3, enhanced test scripts.

LABS SOFTWARE INTERN   EnerNOC | Boston, MA | Jan 2015 - May 2015
Performed development for various projects in EnerNOC Labs including software to aid the marketing department in selling Energy Intelligence Software and a REST API for the Automated Load Control platform.

EDUCATION

B.S. SOFTWARE ENGINEERING   Rochester Institute of Technology | Rochester, NY | 2012 - 2017

SKILLS

- Remote collaboration
- Relational Databases
- Web Development
- Durandal & Knockout JS
- Aurelia

- Quick Learning
- C#/.NET Framework
- Mobile Development
- React JS

- Mobile Development
- Xamarin Forms
- Javascript
- .NET MAUI

PERSONAL

I love dogs, walking, streaming amazing shows, and exploring the beautiful Nevada desert.
